ALVARA

Vision

**To accelerate the decentralization of the global economy;
delivering the world's most popular financial product to cryptocurrency.**

"We are building the Binance of Crypto ETFs." - Callum Mitchell-Clark, Alvara Protocol Founder

'Alvara' - / al-VUH-ra / - derived from the Latin "alvarium", meaning **'beehive'**; also Gothic, meaning '**guard of all'.**

Company Purpose

To provide a fully regulated and secure exchange platform for users to trade, create and manage a wide range of Crypto ETFs.

Our HiveX provides a framework in which the traditional ETF processes of creation and redemption, fund management and transfer of fund ownership can all be executed by a decentralized cohort of investors and fund managers.

The Alvara Protocol is empowering the next generation of digital asset fund managers.

PROBLEM

High Risk Sector

Cryptocurrency's volatility discourages new investors.

Spoilt for Choice

Investors entering crypto are overwhelmed by a huge range of options.

Slow Adoption

Majority of global AUM remain in centralized TradFi markets.

Lack of Verification

Influential leaders require a platform to demonstrate their proficiency.

SOLUTION

Lower Risk Investing

Alvara ETFs manage volatility through diversified investment.

Asset Selection

Top crypto assets grouped together. Diversify your portfolio with a single transaction.

Facilitate Mass Adoption

Offering DeFi investors the world's most popular investment vehicle.

Prowess & Transparency

All fund statistics are displayed on our leaderboard.

The ETF Universe

From 2003-2020 the number of ETFs on the market grew by 2650%.

In 2021 the global ETF industry surpassed $10 trillion AUM, making ETFs the world's number one investment product.

With the rise of digital assets, the Bank of America projects 500% growth by 2030, putting the global AUM at $50 trillion.

Market Projections

Based on market analysis, Alvara has a projected market cap of $545M USD by year 4*, with projected volumes that would rank the **HiveX** in the top 250 cryptocurrency exchanges.

The industry's top 100 Crypto ETFs can expect an average AUM of $254,300,094 USD, with daily volumes of $12,374,507 USD, based on Crypto vs TradFi comparative analysis.

Our aim is to create and list several funds within these top 100. Trading on the **HiveX**, each fund would generate annual fees of $5,788,196*.

CEX ADTV~8=MC

*ADTV * 0.1% + AAUM * 0.5% = Avg Aggregate Annual Fees per ETF

Year 5	210	$2,500,000,000	$121,652,598	$45,977,784
Year 4	120	$1,400,000,000	$68,125,455	$26,403,084
Year 3	70	$860,000,000	$41,848,494.05	$16,615,734
Year 2	45	$260,000,000	$12,651,870	$4,893,675
Year 1	20	$100,000,000	$4,866,103	$1,877,805

Combined AUM, DV and revenue figures take into consideration the varying projected ETF sizes and fee structures of both Alvara and user-built ETFs.
